

ST CECILIA'S PUBLIC SCHOOL
'BEST OUT OF WASTE ACTIVITY' ORGANISED BY ECO CLUB

With the aim of channelizing the creative potential of the students towards practically imbibing the principle of the three R'S – Reduce, Reuse and Recycle in their life , 'Best out of waste Competition' was organized by the Eco Club of St Cecilia's Public School, Vikaspuri. The activity was held on 11.05.18 for all sections of classes IV and V, and on 16.05.18 for all sections of classes VI to XII.

The activity witnessed students booming with energy and creative enthusiasm. The vibrant aura of the school was a culmination of conceptual genius and practical skills of the students, translating their ideas into reality. Students used in as diverse waste materials as possible and used their intellectual skills to create worthy useful objects that can be effectively used by them in school or at home.

The main initiative of the Eco club is to sensitize students towards issues of garbage disposal, segregation and environmental hazards caused due to them. The basic premise is not only to understand the problem but also to bring forth creative solutions in this direction. Our aim is not only to train students into analyzing the issue from diverse perspectives but also to realistically find a way out for the next remedial step.

Students explored their aesthetic and creative abilities to self design articles with immediate utility in their daily life – pen stand, file folder, paper bags, paper baskets, flower vase, lamp, toy vehicles, jewelry box, greeting cards and diverse decorative materials like wall hangings, wind chimes, photo frames and hanging baskets.

The efforts of the students was highly appreciated by Madam Principal, Coordinators, club In charges and all the teachers who supported students in this inevitable important environmental cause.
