

St. Cecilia's Public School Science Exhibition

On August 16, 2018 the middle wing of St. Cecilia's Public School organized the Science Exhibition.

The aim of the organization was to ignite the cognitive, creative and mental abilities of the children by making various working models on different topics.

Although the main themes of the exhibition were:

1. Water Conservation
2. Solar Power
3. Swachh Bharat Abhiyan

Students made different working models on these topics and displayed their ideas and suggestion through which we can keep our environment neat and clean.

They also gave the idea behind the models and explained their benefits by spreading the awareness and contributing their bit towards the safety and protection of our Mother Earth.
