Circular

Dated: 20.05.2026

Dear Parents,

In alignment with the National Education Policy 2020, the National Curriculum for School Education, and Central Board of Secondary Education guidelines, the school has introduced the Computational Thinking (CT) curriculum for Classes III to VIII and the Artificial Intelligence (AI) curriculum for Classes VI to VIII from the academic session 2026–27.

The curriculum aims to develop AI-ready learners by strengthening foundational computational thinking skills such as logical reasoning, problem-solving, pattern recognition, and algorithmic thinking. It also promotes digital literacy, ethical use of technology, and the integration of CT across subjects. This initiative will enable students to understand the relevance of AI in everyday life while fostering creativity, critical thinking, and innovation.

We request the parents to extend their support and encouragement in this initiative so that together we can nurture confident, responsible, and future-ready learners equipped for the challenges and opportunities of the digital age.

The guidelines and the link of the student handbook will be shared by the Class teachers in the Google classroom.

For any further query contact the following teachers after Summer Break.

Garima Shah for class III to V

Nidhi Gupta for class VI to VIII

Regards,

Inderpreet Bhumra
