

St. Cecilia's Public School
Exhibition 'Experiential Learning' by Class V
'Guided Creativity leads to extraordinary Outcomes'

It was indeed proved beautifully by our creative masters of class V on their Exhibition (Experiential Learning) day. The school provided the students an opportunity to exhibit their potential in all the subjects.

The students of class V A presented their beautiful charts and role plays based on Social Studies wherein they commendably explained the current topics like 'CAA', 'Article 370, 35 A' and various continents of the world.

The students of Class V B showcased their 'literary fest' wherein they displayed their talent in various sections like Author's corner, Grammar Corner, Games and Fun Zone, Story Telling by Puppet Show and a Mini Library. The young minds enthusiastically presented their models based on the famous stories of renowned authors.

The students of Class V C were actively involved in the presentation of spectacular games and models based on 'Magical Maths' theme. They put their best efforts in the exhibition hall where all the spectators appreciated their work.

Our class V D students showcased their Science Experiments and games based on scientific concepts such as water, magnetic field, air pressure, etc. They exhibited their scientific temperament very confidently in front of the spectators.

Our overall presentation was well – coordinated and graced by our honourable Manager Madam and Principal Madam who guided and motivated the students throughout.
