Beyond the Horizon: Exploring the World of Blue

The Pre-Primary Wing was filled with joy and cheer on 7th August 2026 as our little Cecilians celebrated Blue Day in a joyous manner.

Dressed in serene shades of blue, the children entered classrooms decorated with blue balloons, streamers and aquatic cut-outs. The vibrant setting created the perfect mood for a day filled with laughter and learning.

The highlight of the day was a Blue Object Hunt, where our tiny stars searched for and identified different blue items from around the classroom, which helped enhance their colour recognition and

vocabulary. The excitement continued with a Blue Object Race. Each child carried a blue object of their choice and walked along the track with care. This activity encouraged responsibility, balance and boosted their confidence.

Blue Day beautifully merged fun with learning — from identifying colours to developing motor skills. It was a delightful experience that left our little ones beaming, self-assured and brimming with joy.
