Quiz-I Report

“Because we all share this planet earth, we have to learn to live in harmony and peace with each other and with nature. This is not a dream, but a necessity.”

-Dalai Lama XIV

Human well-being is directly connected to the way we treat our planet's natural resources. Deforestation, pollution, extinction, loss of biodiversity directly impact quality of living. Destroying nature makes life harder for all of us and even more for those who are already vulnerable. Now it's the time that we should not only live in a harmonious way with each other but also with nature. To Sensitise the students over this burning issue which might bring our own existence under threat, the quiz club of St. Cecilia's Public School, conducted a mass quiz for all students of Classes IX-XII on 11th May 2022. Students participated overwhelmingly and proved that they are concerned and responsible inhabitants of this unique planet called Earth. They were encouraged to take steps to save earth from further damage. We at St. Cecilia's Public School believe that our little steps can turn into a huge leap towards changing people's attitudes towards saving the environment.
