

St. Cecilia's Public School
Science exhibition
Classes VI-XII

The Scientia Club of our school successfully organized the much-awaited Science Exhibition on Innovation in Science & Technology towards Sustainable Development on 28th August 2025 under the able guidance of Madam Principal. The exhibition aimed to encourage scientific curiosity, creativity, and innovative thinking among students.

A total of 57 teams, about 120 students from Classes VI to XII participated, presenting a wide range of innovative models and projects focused on sustainable development, environmental conservation, and technological advancement through models, power point presentations. Each project reflected the students' enthusiasm and understanding of scientific principles applied to real-world challenges.

The exhibition was inaugurated by honourable Director Sir and Madam Principal, whose presence and motivating words inspired the participants. All dignitaries and visitors appreciated the efforts of students and teachers for their dedication, teamwork, and commitment to promoting scientific learning.

Subject teachers and members of the Scientia Club played an active role in guiding and mentoring the teams throughout the preparation process.
