

St. Cecilia's Public School

Orientation and awareness of Cecilians on Dog Bite menace and rabbies on the occassion of WORLD RABIES DAY

Our school joined hands with Directorate of Education, Govt. of NCT in the Endeavour to create awareness in students about the menace of Dog Bite and rabies on the occasion of World Rabies Day (28th September). The students were appreciated about the deadly viral disease of Rabies by conducting special assembly and display of relevant material on school bulletins.

Group discussions in classes, Powerpoint presentation shown in classrooms and further interactive sessions made the students aware about the correct procedures to follow when confronted by stray or unfamiliar dogs. The students appreciated the active steps taken by the school to break the boundaries of ignorance to educate them on proper dog bite protocols.

Madam Principal's address resonated with the spirit of the day as she emphasized the need of access to the critical information to not only enhance safety from dog bite and rabies but also promote responsible behavior around animals.

The students expressed gratitude and vowed to aware all about prevention of rabies, need of getting pets vaccinated, behaving alertly around animals and necessary immediate first aid in case of a Dog bite.

The awareness drive fostered deeper understanding of the world wide need to curb the deadly disease amongst all.
